By carefully avoiding the first and every step towards intemperance shunning the society of the dissolute, and with zeal and ardently devoting Themselves to the acquirement of practical skill theoretic and general information by cheerfully the task to discipline and the hope of receiving the approbation of their country they can alone render themselves able to occupy with honor to themselves the first stations in the Navy, to which many of them are probably destined.

When at Sea, they are to be regularly Watched, and as Watch are considered under the immediate orders of the Officer of the Watch in the same manner as the seamen.

The same power to punish the Marines is given to the Marine Officers as is given to Sea Lieutenants over the Crew.

The Commanding Marine Officer will report daily the returns of the detachment. The Commissioned Marine Officer must always be on board, should there be more than one attached to the Vessel.
